OPHIR

Ophir Global Opportunities Fund (Class B)

Investment Update | October 2026

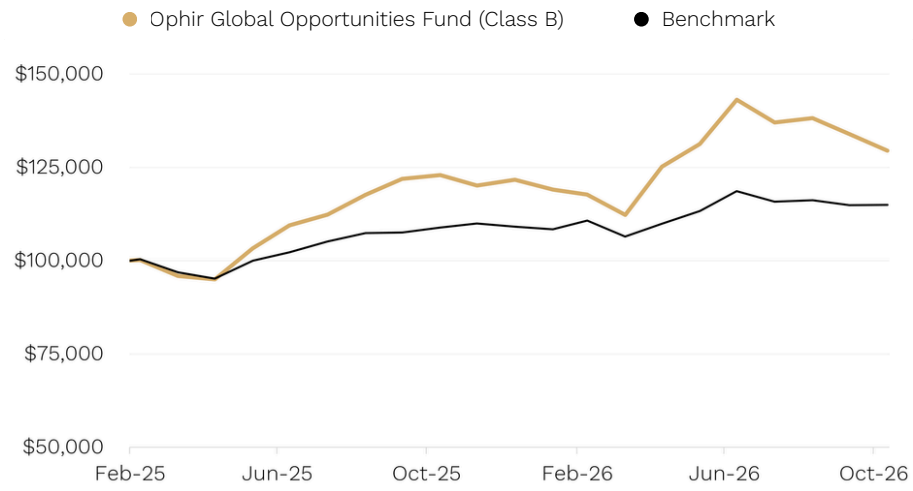

About the Fund

The Ophir Global Opportunities Fund (the Fund) seeks to provide long-term capital growth by investing in a concentrated portfolio of 20 to 50 global small and mid-cap companies. The Fund targets cash generative businesses positioned for structural growth that are under researched, attractively valued and led by high calibre management teams.

Inception Date	Unit Price	Benchmark
20 February 2025	$0.9911	MSCI World SMID Index (Net) (AUD)

Ophir Asset Management

- Privately owned investment manager established in 2012.
- Senior Portfolio Managers are substantial investors in the Fund.
- Experienced investment team with a strong track record across market cycles.
- Funds are capacity constrained to support disciplined portfolio construction and long-term performance.
- Specialist manager with deep expertise in Australian and global small & mid-cap equities.

The above chart represents the growth of $100,000 invested since inception, net of fees, and assuming reinvestment of distributions. Please note past performance is not a reliable indicator of future performance. Total returns have been calculated using exit prices. No allowance has been made for taxation. The Fund's benchmark is the MSCI World SMID Index (Net) (AUD).

Investment Performance at 31 October 2026

	Since Inception p.a.	1Y	6M	3M	1M
Fund Return (Net)	**16.5%**	**5.4%**	**3.4%**	**-5.5%**	**-3.3%**
Benchmark*	8.6%	5.6%	4.6%	-0.7%	0.1%

Performance figures in the table above assume reinvestment of distributions and are calculated using exit prices of the Fund. Past performance is not a reliable indicator of future performance.
*MSCI World SMID Index (Net) (AUD).

Market Commentary

In “Catch Me If You Can” Leonardo DiCaprio’s character, a con man forging cheques, is one step ahead of Tom Hanks’ FBI character throughout the movie. Inflation has been the con man, and the world’s central banks the FBI, always a step behind.

The fugitive has been spotted everywhere. U.S. annual inflation jumped to 3.7% in September from 3.4%, which was hotter than expected and driven by a rebound in fuel prices. UK inflation rose to 3.5%. Eurozone CPI rose to 4.0% in October from 3.8%. Meanwhile, Australian inflation climbed to 4.3% from 4.0%.

Hanks got DiCaprio in the end. Central banks will be hoping they can do the same.

Parts of the AI trade were seen writing cheques their balance sheets can’t cash. CoreWeave, which rents out data-centre capacity, saw its bonds and shares plunge on fears it can’t service its debt. The selling spread to other “neocloud” names.

The bigger question is whether AI companies have a moat at all. Inference costs scale with usage, so more customers means more cost, not just more revenue.

At the time of writing in early November, the Democrats have swept the House, Senate and governors’ races. Data shows markets have historically done better a) after midterms and b) under a divided government (President v Congress/Senate). We now have both.

Turning to markets, while broad indices were little moved over October, there were large gyrations under the surface as AI-exposed stocks got whacked again, similar to what occurred in July.

Small caps slightly outperformed large caps, with the Russell 2000 Index returning +0.6% and the S&P 500 returning -0.9%. Value outperformed growth with the Russell 2000 Value Index up 2.5% versus the Russell 2000 Growth Index down 1.3%.

Similarly, though to a much more significant degree given the higher weight of AI in U.S. large caps, the S&P 500 Value Index rose 4.9%, while the S&P 500 Growth Index fell 5.4%, the biggest monthly difference on record.

Regarding sector performance, Energy was the biggest winner in the S&P 500 (+14.3%), followed by Consumer Staples (+11.6%), while Communication Services (-15.1%) and Technology (-6.8%) fell the most. Within the Russell 2000 Index, Utilities led (+5.4%), followed by Energy (+5.0%), while Technology (-6.0%) and Materials (-5.8%) were the weakest sectors.

At the macro level, central banks are reaching for the handcuffs. The Bank of Canada and the Bank of England each raised rates by 25bps. The Bank of Japan and Reserve Bank of New Zealand held at 1.25% and 2.75%, respectively.

In the U.S., the next Fed meeting is not until early December and will set the global tone. In Australia, the RBA raised rates 25bps to 4.85%, with unemployment at a five-year high of 4.7%.

Inflation is still running. Central banks are still chasing.

Portfolio Commentary

One of the largest contributors to performance for the month was a A$4.7bn organ transplant diagnostic company. The share price rose 34.5% over the month after a strong Q3 earnings beat and an upgrade of the full-year guidance.

One of the largest detractors from performance for the month was a A$7.6bn flash controller company. The share price fell 25.5% over the month, driven by the broad sell-off in semiconductors. We are underweight the sector and remain confident in the long-term growth of the company.

Outlook

Our outlook remains optimistic. Despite ongoing global uncertainty, small caps continue to trade at very attractive discounts to large caps, supporting our outlook over the longer term.

Furthermore, U.S. small-cap earnings growth is continuing to rise as leading economic indicators in the U.S. remain robust. In addition, a divided U.S. government and lower bond yields are tailwinds for small caps going forward.

We have maintained our broadly index-weight exposure to both software and AI-exposed stocks, which has protected the Funds from month-to-month swings in relative performance as uncertainty continues around the AI theme and its huge capex payoff.

Our focus remains on robust industrial businesses, with less macro sensitivity than the market. We will continue our disciplined approach, identifying growing businesses with idiosyncratic earnings drivers that we believe will ultimately find favour.
